

Fracture Liaison Service Database (FLS-DB) annual report 2025 Erratum

Update: August 2025

The FLS-DB annual report 2025 was originally published in January 2025. Version 2 was published in August 2025 to correct an inaccuracy in the description of a key performance indicator, which has been summarised below:

On page 5, Table 1 the standard/rationale column for 'KPI 1 – data completeness' specified that the rationale for the data was calculated using the following rationale:

'Defined as fewer than five fields with more than 20% of data missing.'

This rationale has been corrected to:

'Defined as the proportion of FLSs with at least 80% of KPIs with complete data.'
