Participating in the NAIF has helped us to raise the profile of monitoring how a patient is moved to a bed following a fall

Because of the **NHFD**we changed the choice of
anaesthetics used for our patients

If not for the **FLS-DB**we wouldn't have
reintroduced 12 month
medication reviews

**NAIF** supported the drive to measure lying and standing BP

1111/

Being a member of the **Patient Panel** is a worthwhile experience and a good opportunity to develop and improve services at a national level from a patient and carer perspective

Organising our paperwork to meet **FLS-DB** requirements enabled us to tie up all the best practice elements from published standards into the development of our service

If it wasn't for the **FLS-DB** we wouldn't have data to prove that we are improving patient care and reducing their risk of fracture

The **NHFD** has enabled us to improve our #NOF pathway, prioritise the theatre list and implement FIB

Impact of FFFAP audit participation

The **NHFD** has given us the leverage to prioritise hip fracture patients

As a member of the **Patient Panel**, I work alongside a

dedicated team of professionals
to identify problems and look
for a solution

Taking part in the **NHFD** has improved our fascia iliaca block use

**NHFD** data has helped to inform local improvement projects, business cases and drive up our delivery of care

The FLS-DB enables us to share failed experiences, as well as success stories, If it wasn't for the **FLS-DB** we wouldn't Without the **NHFD** we with other services to drive improvement have been able to commission our FLS wouldn't have 2 innovative orthogeriatricians on our team **NAIF** has prompted us to provide additional Thanks to the **NHFD**, education and learning almost all of our patients opportunities for staff are seen by a physio within 24 hours of surgery Taking part in the **FLS-DB** has prompted us to review our process for identifying spinal fractures. As a result, the FLS team **Impact of FFFAP** and the radiology department have We learn from high audit participation built up a good working relationship and achieving **NHFD** sites have been able to significantly increase **July 2019** incidental spinal fracture findings Taking part in the **FLS-DB** allows us to map our effectiveness Taking part in the **NHFD** has taught us to prioritise hip fracture patients and recognise complications in time so as to The **Patient Panel** gives patients minimise morbidity and mortality and carers a voice in shaping safer and ever more patient-**NAIF** has given us the opportunity to centred services in the future Thanks to the **NHFD** we challenge current falls management

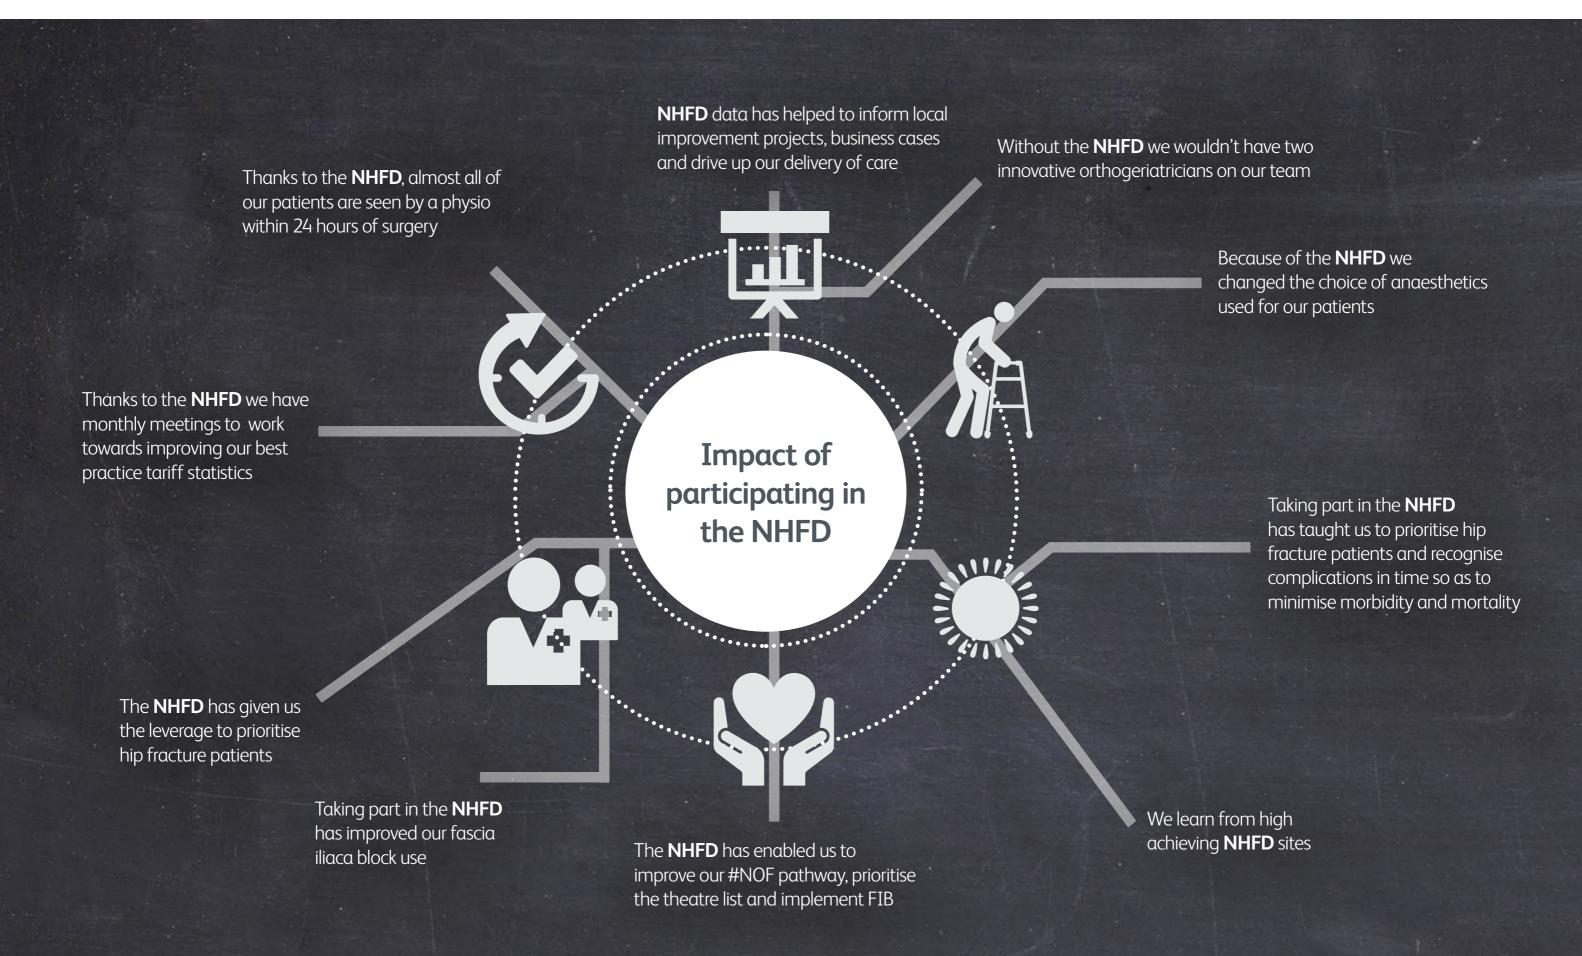

have monthly meetings to

work towards improving our

best practice tariff statistics

techniques and we now have access to

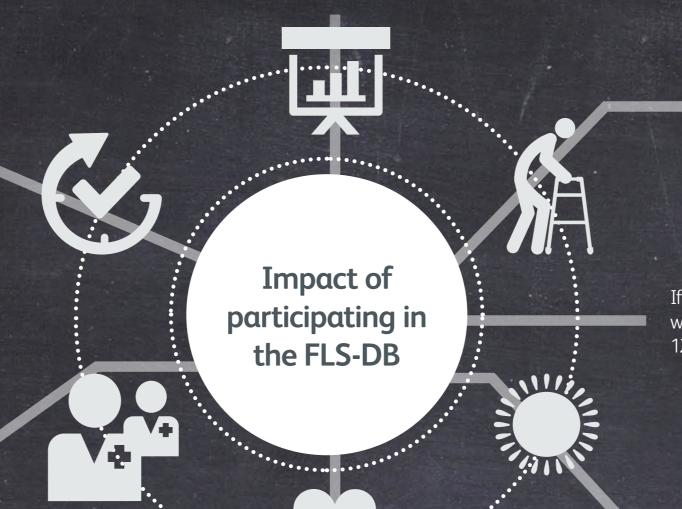

better moving and handling equipment

If it wasn't for the **FLS-DB** we wouldn't have been able to commission our FLS

Taking part in the **FLS-DB**has prompted us to review
our process for identifying
spinal fractures. As a result, the
FLS team and the radiology
department have built up a
good working relationship and
have been able to significantly
increase incidental spinal
fracture findings

The **FLS-DB** enables us to share failed experiences as well as success stories with other services to drive improvement
